

NEWLY ADDED CLAIM

20. (New) A hologram screen comprising:

a hologram film for diffracting light projected from a projector; and

a first transparent member and a second transparent member which together sandwich the hologram film to cover the hologram film from a front surface and a back surface thereof;

wherein at least one of said first transparent member and second transparent member is replaceable, said first and second transparent members being fixed to each other by screws, each of said screws penetrating through-holes provided in both the first and second transparent members and is threaded into a nut, thereby fixing the first and second transparent members to each other.
